

| DNA Database CODIS Hit Technical Review Training Log                              |                         |                    |
|---|-------------------------|--------------------|
| Training Area   | Date Completed/Initials | Trainer's Initials |
| <b>1. Reference Materials</b>   |                         |                    |
| Read and Understand the Procedure for CODIS Hits                                  |                         |                    |
| <b>2. Understand Components of CODIS Hit Technical Reviews</b>                    |                         |                    |
| Ensure CODIS hit record submission information is correct                         |                         |                    |
| Ensure required documentation is included in the FA case record object repository |                         |                    |
| Review worksheets for completion and accuracy                                     |                         |                    |
| Review controls, internal lane standards, and allelic ladders                     |                         |                    |
| Review samples to ensure proper interpretation                                    |                         |                    |
| Review any reworked samples to confirm use of required controls                   |                         |                    |
| Review reported allele calls for accuracy   |                         |                    |
| Ensure no additional hit sample profiles are included on the allele call table    |                         |                    |
| Correction process  |                         |                    |
| Completion in FA  |                         |                    |
| <b>3. Observe a Minimum of 3 CODIS Hit Technical Reviews</b>                      |                         |                    |
| <b>4. Successful Completion of a Minimum of 6 CODIS Hit Technical Reviews</b>     |                         |                    |

DNA Database Forensic Scientist Trainee: \_\_\_\_\_

DNA Database Forensic Scientist Trainer: \_\_\_\_\_

DNA Database Manager: \_\_\_\_\_

This trainee is approved to perform technical reviews of DNA Database CODIS hits.

DNA Technical Leader: \_\_\_\_\_

Date: \_\_\_\_\_
