

Certificate of Quality Control Automate Performance Check

Specifications:

The Automate will be checked annually and after any repair or service with a known and a blank sample. Upon QPCR, the known must contain at least 0.075ng/µl of DNA and the blank must not have any DNA. If DNA is detected in the QPCR results for the blank, the test must be repeated by a DNA Team Leader or the Chief Criminalist.

Reason for the performance check: Annual
After repair, service, or preventative maintenance

Instrument _____ Known Standard _____

Kit Used for Performance Check: PrepFiler PrepFiler BTA

Lot # _____ Expiration Date _____ QC Date _____

Date Performance Check Completed _____ Analyst _____
