

Certificate of Quality Control

Quality Performance Check

Specifications:

Annually and after any repair or service, a known DNA sample, preferably a NIST or NIST-traceable standard, and a blank will be quantitated and amplified. To pass QC, the laboratory sample and the kit positive control must provide the correct DNA profile, and there must not be any contamination in the blank.

Reason for the performance check: Annual

After repair, service, or preventative maintenance

Known Standard _____

Quant Kit Used: Lot # _____ Expiration Date _____ QC Date _____

Amp. Kit Used: Lot # _____ Expiration Date _____ QC Date _____

Date Performance Check Completed _____ Analyst _____

Required records:

- Certificate of Quality Control
- DNA extraction worksheet
- 7500 Setup Worksheet
- QPCR results
- Amplification Worksheet
- STR results

Results of Testing: Pass Fail (Choose One)

Comments:

Approval of COQC Record
by Chief Criminalist, DNA
Team Leader, or designee: _____

Date* _____

*If passed, this is the date released
